

A New Model for PE is Necessary

Robert Pangrazi

Comments

"teachers are the fabric of our society" Thank you!

A presenter I've always hoped to hear speak. From my college professors constant references and glowing reviews to "Robert Pangrzzi" his session did not disappoint. Happy to learn of the resources available for free directly from the legend himself. Nervous for the coming year and all the new changes but excited for the opportunity for positive change in our field. Many useful resources on the landing page I look forward to sharing.

Always enjoy Dr. Pangrazi! Back in my undergrad courses we utilized his publications and he just has a ton of insight and knowledge about the profession! I agree, we definitely need to make a change/shift in our teaching in regards to preparing kids for lifetime fitness! One thing positive I have witnessed from Covid-19 in our community is that more families and people are getting out and being active whether it's walking, biking, kayaking, etc! We need to take the time to really embrace the change and support this movement in Always enjoy listening to his level headed advice!

Bob is a legend in our world and it was great to hear him speak about the importance of embracing remote learning and lifetime activities. Wonderful session. Thank you.

Bob Pangrazi, you never disappoint! I learn something new every Time I listen to a podcast. Thank you for sharing your wisdom, resources and passion to our physical education community!

Covered a wide range of topics and history

Dr Bob talked about a lot of funding. I am starting a new position in a school that has not had a full time teacher in many years. Easy to say things have not been taken care of. Where is a good starting point to research funding for my school?

Dr. Bob was absolutely amazing. Really had me thinking about the state of Physical Education and what I can do to be a better teacher and engage my students in daily physical activity.

Dr. Pangrazi always has great insight and encouragement.

Dr. Pangrazi is awesome! I use his materials often. Thank you!

Dr. Pangrazi is the Guru of PE. His wealth of knowledge and experience is shared in this session. I have been teaching high school Lifetime activities for several years and I am encouraged with his words. We are the doorway to the future and I have taken so many notes on this session so I can share with others. Thank you for inviting Dr. P to speak and Gary does a great job of asking questions. Best session for me so far this week !!

Dr. Pangrazi's explanation of the components of LIFETIME ACTIVITY is a great framework for building remote PE curriculum. There is so much negativity about opening schools and remote learning, masks or no masks, etc. I appreciate the positive outlook for the need to make some changes to teaching PE and that now is a great time to start.

During this session I really like the teaching for a lifetime. Growing up I was all about the team sports activities and now as I am older I agree with what he was saying about teaching individual lifetime to our students. As we get older it gets more difficult to get people together to play team sports so allowing students to connect with individual activities they may enjoy and can do on their own as they get older is important.

Favorite session so far. This session provided excellent advice on how and why to change current PE models.

Focus on non-competitive activities that will allow students to feel better about themselves.
SEL, mind/body activities to encourage a Life time of fitness. Think every day life skills and functionality.
->INTERACTION<- is key! 50/50 social interaction and PE content. Keep activities in short spurts.
Use judgement when sending things home. Safety first!
Ask for funding, then ask again, and again, and again!
Great job and wonderful information to follow up with

Great observations by Dr. Pagrazi. I like his thoughts on what changes we should look to.

Great overview (looking back and forward) of PE in a short session. It's great to hear someone with his experience, knowledge, and insights.

Great presentation. I love the idea of lifetime activities in PE class.

Great resources and affirmation!

Great resources attached to the presentation. Teachers take care if you to help others. You cannot pour from an empty cup! So true. Lifetime activities for the win.

Great session. Thank you

He issued a good challenge to see if there are changes needed in our curriculum.

He provided many things to think about as we go back to school. Great resources!

I always love his sessions! Thanks Gopher

I always love listening to Dr. Pangrazi. He brings a lot of passion and he always tells you his thoughts.

I am familiar with your work- love it!

I love the #ActiveHomeChallenge ideas.

I was nervous about connecting with my students during this crazy pandemic!

Thanks for the "ideas intervention!"

I am looking forward to looking through the resources you provided.

I am not sure I agree with Dr. Pangrazi on a number of key issues. I respect HIM, but do not blindly accept his ideas.

I appreciated learning of two resources that I was not aware of. He gave some good advice! Thx.

I appreciated the information and common sense approach! Great session!

I love Dr. Pangrazi. I have several of his books. I read and watch anything he publishes.

I loved Bob's straight-forward, honest attitude. What a great motivation towards the push we need!

I thought Dr. Pangrazi had a lot of good points. I totally agree that we need to rethink how and what we are teaching. I feel motivated to reshape my curriculum. Thanks for the great resources!

I will request funding and create a learning environment that promotes physical activity and awareness.

It was great to hear input from Dr. Pangrazi, as always! The resources were terrific and it was inspiring to hear Dr. Pangrazi share his wisdom, passion, and expertise.

Much needed "Validation", as I am a believer in lifetime activity in H.S. PE . Change with the times...

Really got me thinking!

Thank you Dr. Pangrazi, for always affirming your appreciation for teachers, I am proud to be a part of that fabric of America. I do want you to know that even though retirement is close, I have always been an advocate about lifetime fitness in my program for my students. I strive to teach my students how to stay healthy and happy throughout their lives, along with teaching them how to work with others, recognizing and accepting the differences in others, and how to show kindness and compassion to each other. Thank you for all of the valuable teaching resources and important reminder that we MUST TAKE CARE OF OURSELVES before we can take care of others!

Thank you for this wonderful session! Very excited to continue on this virtual on-line learning excursion.
Thank you Dr. Pangrazi.

Thank you so much Dr. Pangrazi. You are a wonderful role model. I loved your text book back in the day and now I love how you are so adaptable and able to change with the times. Thank you so much for your enthusiasm and encouragement. These are definitely trying times.

Thank you!

Thank you!

Thanks for sharing. I'm looking forward to exploring the ASAP curriculum.

Thanks for the encouragement and the vast amount of resources that you shared. Wonderful!!

Thanks for the info

Thanks, Bob, love hearing from you. Such important and insightful information. You are an inspiration!
Thanks for sharing your resources. I look forward to delving into them.

This conversation gave a lot of insight to things I have been needing in regards to eLearning. The resources
were also spot on.

This has been the best session of the conference so far. I feel more motivated than ever!

very great, now to try and put all the great ideas into practice!

Very informative

Very thankful for Dr. Pangrazi for providing top notch information and suggests for online learning and how
to move forward in the future with lifelong activity.

What an honor to be able to share some time with this great educator. Thank you!

Wonderful information!

Wow! Thank you for all of the amazing resources. I enjoyed listening to your zoom meet :)
