

Your Voice Matters

Jamie Sparks

Comments

A lot of good information given from this speaker.

Advocacy is critical in HPE and should be done early. "Don't wait until your profession is on the chopping block to advocate." #Equity #Diversity #Inclusion #Advocacy #WSCC Model

Advocacy is the key to our future, we play a huge role in our ever changing world perhaps more so now with the Pandemic. What we do teach students they will use every single day of their life!

At this time, I'm more interested in resources for activities for my curriculum. This was a great Advocacy piece for SHAPE and INSHAPE, but I was hoping for more direction on where to find handouts, cut and paste advocacy documents to pass along to my superintendent and building principals. Thanks for your time and presentation.

Enjoyed his message but the audio was poor and distracting. Sounded like it was reverberating back.

Enjoyed this so much! Great information.

Excellent job! I always enjoy listening to Jamie's perspective and realistic approach to education and the whole child.

Excellent! Thank you Jamie and Lisa. Highlight of my Monday morning. Informative.

Gave me ideas on how to advocate more for my program

Going to start using Jamie's saying that -no matter who you are, what you do, or who you become, you will always use what I taught you everyday.

grateful for the resources provided

Great to hear about Jamie and all his contributions!

Great to hear how advocating for our profession and great motivation from Jamie!

I agree that advocacy BEFORE your program or job is in jeopardy is crucial!

I am looking forward to meeting you at the State conference.

I am only saying this as time is so important. This could have been a 5 minute talk I didn't need to hear over and over how awesome Jamie is. Obviously he is because he's been selected to present. I need materials where I can learn not just listen for the sake of completing something.

I enjoyed the format of the seminar. Great questions.

I have a better understanding of how my voice matters and why it is important to use my voice. I also learned more about the ROC program, the WSCC model and the importance of Speak Out Day.

I know it was really an introduction to what was will be going on. I am sure the rest will be more informative.

I liked his quote- and find myself saying the same to many of my students; No matter who you are, no matter what you do in life, no matter who you become... you will use what I teach you every single day the rest of your life.

I really appreciate the various links that you provided for us. I look forward to looking through them and being able to utilize some of the information in our school Health/PE curriculum.

I really appreciated hearing Jamie's journey through PE and advocacy for the profession. Hearing his perspective as we are about to begin this school year with so many unknowns was a great way to start the professional development this week.

I really liked Jamie's quote "No matter who you are, what you do in life, or who you become, you will use what I teach you every single day for the rest of your life!" Now that is powerful!! I also signed up to receive the National Health Ed Standards Posters and Cards.

I was reminded of the importance of membership in a professional organization and as a result enrolled in membership for the year.

Interesting

Jamie presented on using our voice to improve the H/PE profession and raising the standard of teaching. He gave great insight to the Whole Child and the priorities we need to keep in mind. I will reference my notes in the fall as I work with equity in the class and represent kids the kids I teach.
Good information and session

Jamie was an interesting speaker. I was hoping to get a more detailed format to advocate to my school corporation administration of the importance of Health and Physical Education.

Jamie was very interesting. Look forward to checking out his material.

Jamie, You are AMAZING! When you speak everyone listens. You are the STAR of our profession! Ranked amongst the best in our field. Keep doing what you are doing, you were made for this profession!

Thank you for always being our VOICE and helping us be a Voice for our people!

Really good ideas about strengthening those bonds with not only administration, but also the higher ups (state reps, etc.)

Sounded like there was some carry over with the sound. Not sure if that was my device or from Jamie and Lisa. Honestly, GREAT content! Thanks for all your work :)

Thank you for providing the conference this week so that teachers could attend on their own time and not a set time.

Thank you!

Thank you for stressing the importance of advocating for our profession.

Thank you for the additional resources. This was a very good introductory session!

Thank you for your insight. Audio had echo.

Thank you Jamie Sparks!!! Advocate, Advocate, Advocate Daily!!

Thank you!

The audio feedback made her hard to hear and understand. What I was able to hear last night was insightful.

The Facilitator asked really good questions.

Very interesting speaker. Awesome work~

Wear headphones to help eliminate feedback (echo voices)!
